How to Protect Your Office 365 Environment and Reduce Email Threats with Zix

Many companies in regulated industries are
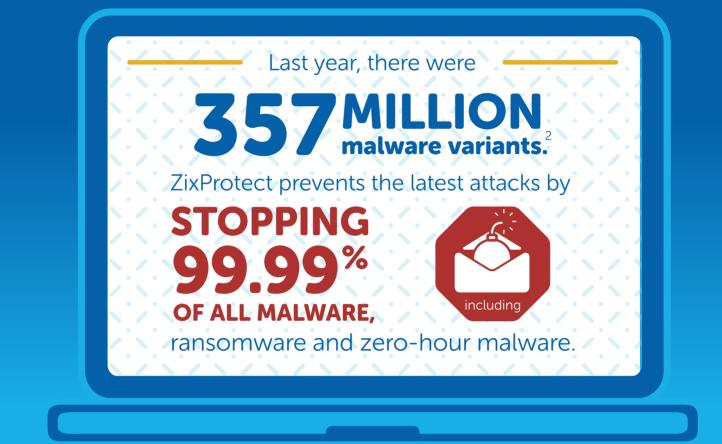

adding an additional layer of security outside of Office 365.

According to Gartner Research, **35**% of client organizations that move to Office 365 are supplementing the offering's natively available email security capabilities with a third-party product.[1]

Here is how ZixProtect can help you reduce email threats and enrich your Office 365 environment:

Last year, there were

357 **MILLION** malware variants.[2]

ZixProtect prevents the latest attacks by

STOPPING **99.99**% **OF ALL MALWARE,** ransomware and zero-hour malware.

including

53% OF EMAILS ARE SPAM.[2]

ZixProtect keeps **99.5**% of unwanted emails out of employee inboxes

— **AND** —

keeps the good email flowing with a **less than .001% false positive rate.**

ZixProtect provides a **multi-layer approach,** so you can immediately defend against email threats with little to no fine-tuning.

Have unique needs?
Customizable security filters can be enabled or disabled with ease.

If your Office 365 email goes down,
